Dewi Elfidasari, Fahma:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "The effect of water quality on the population density of Pterygoplichthys pardalis in the Ciliwung River, Indonesia".

Our decision is: Revisions Required

Note: Kindly invite professional English editor (eg. scribendi.com, elsevier.com, etc) prior to resubmit your revised paper.

Smujo Editors  
editors@smujo.id-----  
Reviewer C:

- There are some confusing sentences. Please rewrite
- Use the word consistently, for example, the word "Ciliwung River" suddenly below becomes "Ciliwung Watershed"
- Write the formula using calculations
- The reason or consideration for the selection of sampling stations is unclear
- Selection of research parameter is not clear
- Fish population data at each sampling station is not clearly presented in tabular form
- Some results appear without being explained before in the method chapter
- Double-check the sentence structure and consistency of writing
- Write citation and reference following Guidance For Authors

Recommendation: Revisions Required

Dewi Elfidasari, Fahma:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Short Communication: The effect of water quality on the population density of *Pterygoplichthys pardalis* in the Ciliwung River, Jakarta, Indonesia".

Our decision is: Revisions Required

Smujo Editors  
editors@smujo.id-----  
Reviewer A:

Catatan artikel water quality

Abstract:

Di baris 6-7 tertulis: Data were obtained by measuring the water quality parameters at three stations. These include the DO, BOD, pH, rainfall, temperature, water clearness, turbidity, current velocity, river depth, ammoniac and phosphate levels, as well as the fish density and population.

Sebagian parameter yang didaftar tidak termasuk "water quality", yaitu "rainfall, fish density, population". Frasa "fish density and population" tidak tepat, karena "density" itu salah satu atribut populasi.

Kedua kalimat tersebut saya edit jadi: Data were obtained by measuring DO, BOD, pH, rainfall, temperature, water clearness, turbidity, current velocity, river depth, ammoniac, and phosphate levels, as well as the fish population density.

Frasa "its density and population" sering muncul. Yang lebih tepat adalah "population density"

Di Introduction tertulis: Besides, the existence of pollution tends to influence the quality of water, which has a direct impact on aquatic biota (Kisku et al. 2017; Shetty et al. 2015).

Frasa "the existence of pollution" tidak tepat. Yang berpengaruh pada kualitas air itu "pollution" bukan "the existence of pollution."

Di halaman 4, di atas Tabel 2 tertulis: The results of BOD5 measurements in the three locations showed that the pollution level is still low and categorized as good water. Pernyataan ini bertentangan dengan pernyataan di halaman 6 di bawah Tabel 5: The values of the physical and chemical parameters provide information that the condition of the river waters has been highly polluted.

Di artikel ini banyak penggunaan decimal berupa koma yang seharusnya titik.

Artikel ini banyak menggunakan kalimat yang tidak efektif dan melakukan pengulangan yang tidak perlu. Kalimat-kalimat tersebut sudah saya revisi.

Conclusion terlalu panjang, jadi saya ringkas.

Recommendation: Revisions Required

2020-05-07 08:59 PM

Dewi Elfidasari, Fahma:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "The effect of water quality on the population density of *Pterygoplichthys pardalis* in the Ciliwung River, Indonesia".

Our decision is: Revisions Required

Note: Kindly invite professional English editor (eg. scribendi.com, elsevier.com, etc) prior to resubmit your revised paper.

Smujo Editors  
editors@smujo.id

-----  
Reviewer C:

- There are some confusing sentences. Please rewrite
- Use the word consistently, for example, the word "Ciliwung River" suddenly below becomes "Ciliwung Watershed"
- Write the formula using calculations
- The reason or consideration for the selection of sampling stations is unclear
- Selection of research parameter is not clear
- Fish population data at each sampling station is not clearly presented in tabular form
- Some results appear without being explained before in the method chapter
- Double-check the sentence structure and consistency of writing
- Write citation and reference following Guidance For Authors

Recommendation: Revisions Required

Abstract:

Di baris 6-7 tertulis: Data were obtained by measuring the water quality parameters at three stations. These include the DO, BOD, pH, rainfall, temperature, water clearness, turbidity, current velocity, river depth, ammoniac and phosphate levels, as well as the fish density and population.

Sebagian parameter yang didaftar tidak termasuk "water quality", yaitu "rainfall, fish density, population". Frasa "fish density and population" tidak tepat, karena "density" itu salah satu atribut populasi.

Kedua kalimat tersebut saya edit jadi: Data were obtained by measuring DO, BOD, pH, rainfall, temperature, water clearness, turbidity, current velocity, river depth, ammoniac, and phosphate levels, as well as the fish population density.

Frasa "its density and population" sering muncul. Yang lebih tepat adalah "population density"

Di Introduction tertulis: Besides, the existence of pollution tends to influence the quality of water, which has a direct impact on aquatic biota (Kisku et al. 2017; Shetty et al. 2015).

Frasa "the existence of pollution" tidak tepat. Yang berpengaruh pada kualitas air itu "pollution" bukan "the existence of pollution."

Di halaman 4, di atas Tabel 2 tertulis: The results of BOD5 measurements in the three locations showed that the pollution level is still low and categorized as good water. Pernyataan ini bertentangan dengan pernyataan di halaman 6 di bawah Tabel 5: The values of the physical and chemical parameters provide information that the condition of the river waters has been highly polluted.

## [biodiv] Editor Decision

2020-08-15 09:11 AM

DEWI ELFIDASARI, FAHMA WIJAYANTI, HURUNIN FATHONAH MUTHMAINAH:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Short Communication: The effect of water quality on the population density of *Pterygoplichthys pardalis* in the Ciliwung River, Jakarta, Indonesia".

Our decision is to: Accept Submission

Smujo Editors

Catatan artikel water quality

editors

2020-07-30

12:38 PM

Abstract:

Di baris 6-7 tertulis: Data were obtained by measuring the water quality parameters at three stations. These include the DO, BOD, pH, rainfall, temperature, water clearness, turbidity, current velocity, river depth, ammoniac and phosphate levels, as well as the fish density and population.

Sebagian parameter yang didaftar tidak termasuk "water quality", yaitu "rainfall, fish density, population". Frasa "fish density and population" tidak tepat, karena "density" itu salah satu atribut populasi.

Kedua kalimat tersebut saya edit jadi: Data were obtained by measuring DO, BOD, pH, rainfall, temperature, water clearness, turbidity, current velocity, river depth, ammoniac, and phosphate levels, as well as the fish population density.

Frasa "its density and population" sering muncul. Yang lebih tepat adalah "population density"

Di Introduction tertulis: Besides, the existence of pollution tends to influence the quality of water, which has a direct impact on aquatic biota (Kisku et al. 2017; Shetty et al. 2015).

Frasa "the existence of pollution" tidak tepat. Yang berpengaruh pada kualitas air itu "pollution" bukan "the existence of pollution."
